PROFESSIONAL SUMMARY

Backend Developer graduate with experience in building REST APIs, real-time systems, and scalable backend services using Node.js, NestJS, PostgreSQL, Redis, and Docker. Strong problem-solving skills with experience developing stock analysis and booking systems.

PROJECT EXPERIENCE

Stock Analyzer System

Nov 2025 – Mar 2026

Tech: Node.js, NestJS, PostgreSQL, Redis, Docker, WebSocket

- Analyzed financial data requirements and defined system architecture
- Designed REST API structure and real-time data flow
- Created database schema using PostgreSQL and Redis for performance optimization
- Translated analytical requirements into backend services
- Collaborated with team members to ensure scalability and system performance
- Achievement: Successfully deployed production-ready system using Docker.

Health Checkup System

Nov 2025 – Sep 2025

Tech: Node.js, Express, Prisma, MySQL

- Designed API structure and database schema
- Translated business logic into backend services
- Improved query performance and system efficiency
- Collaborated with frontend team to align system flow

Intelligent Motorcycle Selection Assistant System

Nov 2024 – Sep 2025

Tech: Node.js, Express, Prisma, MySQL, Python

Algorithm: AHP, TOPSIS

- Designed system workflow and data processing logic
- Implemented AHP and TOPSIS algorithms for decision support
- Built backend services to support analytical processes
- Translated user needs into technical solutions

TECHNICAL SKILLS

Languages: JavaScript (Node.js), TypeScript, Python

Backend: Node.js, Express.js, NestJS, REST API, Microservices

Frontend: React, Next.js, Tailwind CSS, Bootstrap

Database: MySQL, PostgreSQL, Prisma, Redis

Real-Time: WebSocket

DevOps & Deployment: Docker, Nginx, APISIX

Architecture: Monolithic, Microservices, ER Diagram, Sequence Diagram

Domain Knowledge: Financial Data Systems, API Integration, Stock Market Data Flow

Tools: Git (GitHub/GitLab), Postman, Swagger, SonarQube

AI Integration: Basic AI Integration, AI Limitations Understanding, AI Agentic Lifecycle

COLLABORATION & COMMUNICATION

- Communicated with development teams to align system requirements
- Able to translate business requirements into technical solutions
- Understanding of Agile/Scrum workflow
- Strong analytical and problem-solving skills

EDUCATION

Bachelor's Degree in Digital Business Technology

Apr 2022 – May 2026

Faculty of Business Administration and Information Technology

Rajamangala University of Technology Isan, Khon Kaen Campus

GPA: 3.79
